S10-TextToSpeech-TTS-Home Assignment

Request and Response

The screenshot displays a REST client interface with the following details:

- URL:** `https://api.groq.com/openai/v1/audio/speech`
- Method:** `POST`
- Body (JSON):**

```
{
  "model": "canopylabs/orpheus-v1-english",
  "input": "The only person you are destined to become is the person you decide to be.",
  "voice": "autumn",
  "response_format": "wav"
}
```
- Status:** `200 OK` (874 ms, 237.04 KB)
- Response:** The response area is currently empty, showing only a black background.

The screenshot displays a REST client interface with a POST request to `https://api.groq.com/openai/v1/chat/completions`. The request body is a JSON object with a `messages` array containing a system message and a user message. The system message instructs the model to act as a language translator. The user message says "Hello Good Morning .Translate in Spanish". The response is a 200 OK status with a JSON body containing a `message` object with `role` "assistant", `content` "Hola, buenos días.", and a detailed `reasoning` block explaining the translation process. The response also includes `logprobs` as null and `finish_reason` as "stop".

```
